DETAILED ACTION

1. Receipt is acknowledged of Applicant's Prior Art Statement, filed February 12, 2002.
2. Claims 1-29 are presented for examination.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, and 4-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Corcoran, Jr. et al. Corcoran, Jr. et al disclose a gang saw blade for cutting through silicon wafers comprising all of the subject matter set forth in applicant's claims above. Note the use of a polyamide resin and metal particles in the composition of the abrasive disks.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 9, 11-18, 20-26, and 28-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Corcoran, Jr. et al. To apply the method of Corcoran, Jr. et al to the particular problem of separating one quad flat, no lead, integrated circuit package from another would have

been an obvious application of the method, since it is known to dice such integrated circuits by abrasive cutting saws after manufacture in batch on a single wafer.

7. Claims 3, 10, 19, and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Any inquiry concerning this communication should be directed to Robert Rose at telephone number (703) 308-1360.
